

MAS Consolidation Guidance for Add SIN Modifications March 2020

If you have accepted the MAS Consolidation Mass Modification (Mass Mod) A812, you can now add any of the 300+ Special Item Numbers (SINs) available under the Multiple Award Schedule (MAS) solicitation to your contract. However, we ask that you do not submit an “add SIN” modification request **if you currently have multiple MAS contracts and the SIN you want to add is already offered under a different MAS contract**. Doing so would just duplicate the SINs on your current MAS contracts.

If you submit an add SIN Mod, and market research finds the SIN is already under your other MAS contract(s), the CO/CS reserves the right to reject the add SIN modification request or request that it be withdrawn.

If you are ready to start Phase 3 of MAS Consolidation with the goal of getting down to one contract per Unique Entity Identifier (UEI), e.g. Data Universal Numbering System (DUNS) number, this process must be coordinated with all of your MAS Contracting Officers/Contracting Specialists (CO/CS). The MAS PMO will be reaching out to all contractors impacted by Phase 3 beginning in August 2020. If you have additional questions about Phase 3, please reach out to the MAS PMO at MASPMO@gsa.gov.
