INSTRUCTIONS: Map the relevant proposed GSA schedule labor categories into the Labor Category Baseline for the anticipated labor categories listed in the TORFQ. If a proposed GSA labor category is not relevant to any of the anticipated labor categories listed in the TORFQ, it does not have to be mapped. The GSA labor categories should not be mapped to multiple baseline categories, but to the single most appropriate baseline category. The Labor Category Baseline minimum education and experience requirements are provided on the EXPRESS public website. GSA labor categories must meet the minimum education and experience requirements for the Labor Category Baseline to which they are mapped. If a GSA labor category has multiple education/experience criteria, as a minimum, it must meet at least one of the baseline requirements to be mapped to that baseline category.

All SINs associated with each labor category, as identified in Atch 4 apply to this effort.
