**Streamlined Furniture Procurement from GSA MAS 71**

GSA Multiple Award Schedule (MAS) 71 is ready to be your source for furniture. Whenever you need any type of furniture, you can find it on GSA MAS 71. If you have a complex requirement for your tenant outfitting needs, consider the Packaged Furniture Program.

Available under GSA MAS 71, the Packaged Furniture Program is a more convenient and economical way to furnish a complete office, healthcare facility, dormitory, or quarters facility, as well as other rooms. Project management, delivery, and installation are included, as well as other services – such as design and layout, site preparation, staging, and warehousing – to meet even the most complex requirement.

What's more, this program allows a single supplier to get the entire job done for you!

**See the Newest Features and Offerings of the Program**

In April 2017, the Packaged Furniture Program expanded to include a greater variety of MAS products and services for outfitting a variety of spaces. GSA MAS 71 opened the Packaged Furniture Program to all Schedules, allowing project integrators to provide a total tenant outfitting solution. With a single contract, your packaged room can include all of the required ancillary non-furniture items. For example, appliances from GSA MAS 51 V could be included for a packaged lounge, and AV equipment from GSA MAS 58 I could be included in a conference or training room.
